Since joining ReCAAP ISC in January 2026, my journey has been both professionally enriching and personally meaningful. Working with our Focal Points and Contact Point, I support the timely verification and sharing of piracy and armed robbery incident reports through the IFN system. This experience has deepened my appreciation for the importance of regional cooperation in maritime safety.

Conducting of FPTP in Jan 2026

Among the most memorable experiences during my time at ReCAAP ISC were attending the Governing Council Meeting in Singapore and representing the Centre at the APHoMSA meeting in the Solomon Islands. Seeing representatives from various nations come together with a shared commitment to strengthen regional cooperation reinforced my belief that combating piracy is a shared international responsibility. As a former seafarer, sharing piracy and armed robbery trends with Pacific island nations allowed me to combine practical maritime experience with international engagement, broadening my perspective and strengthening my communication skills.

Speaker at the 25th APHoMSA in Honiara, Solomon Islands

Above all, this journey has reaffirmed that protecting lives and ensuring safety at sea remain the highest priority. I am proud to contribute to this mission through ReCAAP ISC and grateful for the opportunity to work alongside dedicated colleagues and maritime professionals in strengthening regional maritime security.
